The mechanism of action:

Diakur Plus is an anti-diarrheal oral supplement for calves used to help dehydrated young calves under stress due to dietary changes or environmental changes.

Indications:

Diakur Plus should be fed to calves in the following cases:

Stabilization of water and electrolyte balance in calves

During indigestion or improvement of diarrhea

During stress caused by dietary changes

During stress caused by environmental changes

Oral fluid therapy for calves with diarrhea

Helps rapid absorption of electrolytes in water

Amount and method of consumption:

For 50 kg calves: Mix a 100 g sachet of Diakur Plus in 2 liters of warm milk or water at 35-40 ° C and feed it to the calf immediately. This combination should be used 2-3 times a day for 1-7 days.

For calves larger than 50 kg: Mix 1.5 sachets (150 g) of Diakur Plus in 3 liters of milk or water.

Precautions:

The prepared mixture should be consumed immediately, so discard the unused amount every day. It is recommended that a veterinarian's opinion is sought before use.

Storage Conditions:

Store in a dry place below 30 ° C.

Keep out of reach of children.

Packing:

100 g Sachets and 3 kg & 10 kg buckets.

Manufacturer:

Boehringer Ingelheim, Denmark.

Marketing Authorization Holder:

Boehringer Ingelheim, Germany.
